

WHY TEOREMA RESTYLING

- ❑ Our purpose was to give a premium and more modern look to the machine, and at the same time give it substance in terms of ergonomics, ease of use, flexibility, consistency.
- ❑ All the components that can make the difference during the work have been redesigned: filter holder handles, steam levers, steam pipes, coffee buttons.

PRODUCT RESTYLING

The new models replace the whole top version, while they are added to the low version.

CURRENT VERSIONS

- Glossy white body
- Black keypad
- Semiautomatic
- Automatic with or without AS

NEW VERSIONS

- Gold brown matt body
- Black keypad
- Wood finishes
- Low and high with or without AS

GROUPS ADJUSTMENT

- The temperature adjustment of the groups has been designed to satisfy some **needs related both to the characteristics of the coffee and to its extraction flexibility.**
- Teorema T makes this operation easy thanks to the **adjustment that is obtained turning the wooden knob** placed on the cup warmer near group
- The knob is removable and occupies the space of an espresso cup

ANSWERS FOR OUR CLIENTS NEEDS

One machine, several grinders

The need to increase the coffee menu makes it necessary to increase the number of grinders. For each type of coffee it is possible/necessary to match the ideal extraction temperature.

One machine, two drinks

To optimally dispense *ESPRESSO* and *COFFEE CREAM*, it is necessary to have an extraction temperature for the lower coffee cream.

A few degrees more on the single!!!

To improve the extraction of a single coffee it is possible to increase the water temperature by a few degrees, dedicating a group to its preparation.

Coffee evolves continuously.

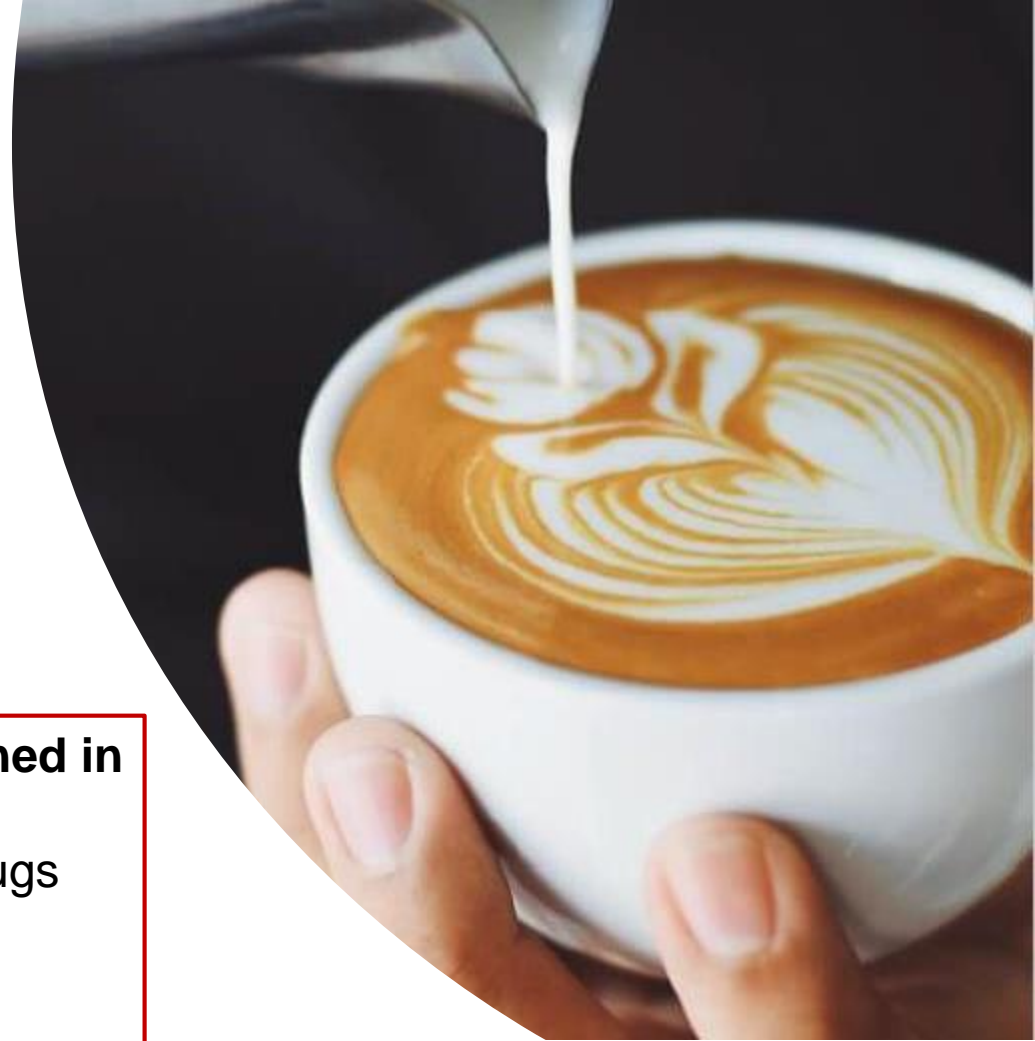

This system allows to self-manage all the result fluctuations in the cup related to the product freshness (problems related to too fresh or too old coffee)

STEAM WANDS

- ❑ The wands have been designed in **new shapes** to create perfect cappuccinos with all types of jugs and milk.
- ❑ Both the type of bulbs and the steam wands have been designed with a suitable **inclination** and **length** to adapt to the manual skills of each bartender
